

## **Ginguro Pursuing Exploration Asset in Latvia**

**SUDBURY, ONTARIO – December 20, 2013** – Ginguro Exploration Inc. (TSX-V: GEG) (the “Company”) wishes to advise that the Company has had a series of discussions with the Government of Latvia regarding the development of a mineral exploration project in the Kurzeme region of the country.

Discussions are ongoing and Ginguro considers that they are progressing positively. To date, no agreement of any kind has been entered into.

Ginguro understands that Latvia has no history of metal mining due to a limestone formation, which covers the entire country. However, with the use of modern geophysical techniques, the Company believes that successful mineral exploration through the overlying limestone formations may be possible. Ginguro considers the basement rocks of Latvia to be highly prospective.

### **About Ginguro**

Ginguro Exploration Inc. is a mineral exploration company focused on the advancement of its Pardo paleo-placer gold property, located in Pardo Township in northern Ontario. To learn more about Ginguro Exploration Inc., please visit: [www.ginguro.com](http://www.ginguro.com).
